

MICHIGAN: Cement Industry Impact

PLANT LOCATIONS

MICHIGAN ECONOMIC DATA*

- Cement and related economic contribution to state: **\$3.6 billion**
- Cement and related employees: 4,180 with a payroll of **\$329.9 million**
- Cement employees: 199 with a payroll of **\$16.8 million**
- Cement and related industries' contribution to state tax revenue: **\$58.4 million**
- Michigan is the **7th largest** cement-producing state in the nation

**Data based on 2023 ACA Market Intelligence survey results*

MICHIGAN SENATORS: Gary Peters (D) and Elissa Slotkin (D)

COMPANY	LOCATION	HOUSE MEMBERS
Amrize	Alpena	Jack Bergman (R-1st)
St. Marys Cement	Charlevoix	Jack Bergman (R-1st)
St. Marys Cement¹	Detroit	Shri Thanedar (D-13th)

TERMINALS

Amrize, Detroit, Shri Thanedar (D-13th)
Amrize, Essexville, Kristen McDonald Rivet (D-8th)
Amrize, Lansing, Tom Barrett (R-7th)
Amrize, Muskegon, Hillary Scholten (D-MI-3)
Amrize, Saginaw, Kristen McDonald Rivet (D-8th)
Amrize, St. Joseph, Bill Huizenga (R-4th)
Amrize, Wixom, Haley Stevens (D-11th)
Amrize, Zilwaukee, Kristen McDonald Rivet (D-8th)
Ash Grove, a CRH Company Detroit, Shri Thanedar (D-13th)
Ash Grove, a CRH Company Dundee, Tim Walberg (D-5th)
Buzzi Unicem USA Grandville, Hillary Scholten (D-3rd)
Buzzi Unicem USA Elmira, Jack Bergman (D-1st)

Locations with terminals are indicated on the map with a black dot

American Cement Association, Representing America's Cement Manufacturers

The cement and concrete industry contributes approximately **\$130 billion to the U.S. economy** and directly and indirectly employs 577,000 people. It operates in every state in the continental U.S.

Concrete is formed when cement is mixed with water and aggregate (sand and rock) and allowed to harden. Cement is the glue that holds concrete together.

Concrete, the second most-utilized material in the world after water, sees an annual usage of about 260 million cubic yards in the U.S. In plain terms, that's 600 times the amount of concrete in The Pentagon—annually.

Concrete is used to build highways, bridges, airport runways, water and sewage pipes, high-rise buildings, dams, homes, floors, sidewalks, and driveways. Concrete's durability makes it the most disaster-resilient construction material available.

For decades, ACA member companies have invested millions of dollars in research and state-of-the-art technology to manufacture resilient and sustainable cement for use in construction.

The American Cement Association is the premier policy, research, education, and market intelligence organization serving America's cement industry. ACA supports sustainability, innovation, and safety while fostering continuous improvement in cement manufacturing, distribution, infrastructure, and economic growth.
